Profile Summary

Seeking opportunities in **Cyber Security**, **Machine Learning**, and **Software Engineering** that foster **professional development**, provide **challenging experiences**, and support **personal growth** through solving **real-world problems**. Proficient in Python, ML, AI, and software engineering fundamentals with hands-on experience in academic and practical projects. Currently pursuing B.Tech in CSE and expanding knowledge and skills in emerging technologies.

Academic Records

Haldia Institute of Technology, Haldia (CGPA: 8.28 till 6th sem) **2023 – 2027**
Bachelor of Technology in Computer Science and Engineering *Haldia, West Bengal*

Contai Public School (Percentage: 79.75) **2021 – 2023**
Indian School Certificate – (PCMB) *Contai, West Bengal*

Contai Public School (Percentage: 89.8) **2021**
Indian Certificate of Secondary Education *Contai, West Bengal*

Experience

Computer Society of India (CSI) **Jul 2024 – Jul 2025**
Core Member *Haldia Institute of Technology*

- Actively participated in organizing technical events and workshops.
- Collaborated with team members to promote technical learning and student engagement.

Projects

Iris Species Predictor | View | *Python, ML algorithm, Streamlit, Pickle* **January 2026**

- Developed and implemented a real-time Iris flower petal species detection using Logistic Regression and hosted with Streamlit and Python Pickle.

Real Estate Valuation Prediction | GitHub | *Python, Regression ML* **February 2026**

- Developed and implemented a Regression Machine Learning Model which predicts the price of any real estate based on the training and test dataset. Prepared a Report based on this.

AI Phishing Email Detector | GitHub | *AI, NLP, Phishing, Threats, Flask, FastAPI* **April 2026 – Present**

- Designing and implementing an NLP-based phishing email detection system using text classification and threat analysis techniques, exposed via a REST API.

Resource-Adaptive Federated Learning | GitHub | *Federated Learning, Deep Learning* **Jul 2026 – Dec 2026**

- Developing a federated learning framework that trains a shared model without transferring raw client data while allowing resource-constrained devices to use different model sizes.

Personal Python Projects | GitHub | *Python* **2024 – Present**

- Developed console-based Python applications including Hello Calculator, Number Guessing Game, Contact Book, Weather Data Viewer (JSON), and Typing Speed Tester using core Python concepts and standard libraries.

Technical Skills

Programming Languages: Python, C, Java, HTML/CSS
Databases: MySQL, MongoDB, PostgreSQL, SQL
Data Engineering: ETL, Data Cleaning, Data Preprocessing
Software Engineering: Software Development Life Cycle (SDLC), Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA)
Developer Tools: VS Code, Jupyter Notebook, Git, GitHub
Libraries/Frameworks: NumPy, Pandas, scikit-learn, Seaborn, TensorFlow, XGBoost, Flask, FastAPI
AI/ML: Artificial Intelligence (AI), Machine Learning (ML), Deep Learning (DL), Natural Language Processing (NLP), Generative AI (GenAI)
Additional Skills: Cyber Security, SEO Basics
Languages: English, Hindi, Bengali

Trainings

Indian School of Ethical Hacking (In House Internship Training) **January 2026 – February 2026**

Advanced Python with Machine Learning and Cyber Security

- Trained in Machine Learning and basics of Deep Learning.
- Trained in basics of Cyber Security and analysis.

AI for Everyone - Certified AI NATIVE **Mar 2026 – May 2026**

AI for Engineers Arena

- Built an AI-powered Email Phishing Detector to identify potentially malicious emails in real time using machine learning techniques.
- Implemented phishing detection with Gmail API integration to analyze emails and assist in identifying suspicious content.
